EIRENA / FICTIONAL DEMONSTRATION

PARA assessment and case review sample

DEMO-001 | Housing provider | Initial assessment: 05/10/2026

All people, locations, incidents and findings in this sample are fictional. This is a marketing demonstration of the PARA pilot and an illustrative case-review output, not evidence of client results.

1. Case summary

Person A reports repeated intimidation over several months, with more frequent direct threats in the last week and retaliation after reporting. They avoid the shared entrance, experience disturbed sleep and fear physical escalation. An earlier intervention reportedly had limited effect.

2. Evidence and uncertainty

The affected person's account and an incident diary form the starting record. Doorbell footage may be available but has not been reviewed. Establish whether an independent witness saw the latest threat. Record allegations as allegations until the evidence supports a finding.

3. Risk assessment

The built-in example describes an Elevated pilot score and a High professional judgement of continued-ASB risk. These intentionally differ: repeated direct threats, retaliation and a worsening pattern justify the recorded professional judgement. Likelihood is recorded as Likely and consequence as Serious.

Protective factors include regular family contact, support-worker involvement and potential camera coverage. They do not remove the need for a prompt safety response.

Pilot limitation

PARA scoring descriptors and categories require testing, validation and alignment with the commissioning organisation's policies before operational deployment. Serious single risks and professional judgement take priority over a numerical score. ICO registration is not product approval.

From assessment to a clear action plan

4. Illustrative case-review findings

Strengths: the reported pattern and personal impact are captured, protective factors are identified and a review date is proposed. Gaps: the latest threat is not yet independently corroborated; footage is not reviewed; earlier intervention outcomes need a clearer chronology.

5. Actions and accountability

Action	Owner	Due / status
Agree a reporting and support plan with Person A.	Fictional case officer	06/10/2026 In progress
Preserve and review relevant footage; update the evidence plan.	Fictional evidence lead	07/10/2026 Planned
Review escalation concerns with the case manager.	Fictional case manager	06/10/2026 Planned

6. Review and proposed outcome

Remain open and review on 12/10/2026, or sooner after any new threat, incident or significant change. Review the agreed actions, update the assessment and document the reasons for the next decision. Apply the provider's current emergency, safeguarding and escalation arrangements.

What Eirena can help with

An independent Case Health Check can examine the chronology, evidence gaps, risk reasoning and next-step plan. Practical learning sessions help teams improve how they record and explain decisions.

Contact enquiries@eirena.co.uk to discuss a demonstration or review. Do not send identifiable case information through the public website or initial enquiry email.
